APPLICATION OF PREVENTATIVE COATING TO EXTERIOR ALUMINUM

ALLOY SURFACES

- 1) Delta Air Lines has accepted by reference (a) our proposal, reference (b), prepared in accordance with MCL No. 10,434, reference (c). Delta airplane numbers 1 thru 10 are affected by this change. Accordingly, all departments concerned are directed to proceed with the change outlined in reference (b).
- 2) Engineering Specification Section will forward necessary revised specification pages to the Contracts Department within four weeks (12/9/59) per reference (d). The reference (b) CCP however is approved contingent upon the following revision:
 - b. One coat white pigmented "Epoxy" top coat, Spec. 0.03021 Type II
- 3) This change has no affect on performance, contract price, delivery schedule and results in a weight increase in guaranteed weight empty of 100 pounds.

APPLICATION OF PREVENTATIVE COATING TO EXTERIOR ALUMINUM ALLOY SURFACES

Delta Air Lines has accepted by Reference (a), our Proposal, Reference (b), prepared in accordance with MCL No. 10,434, Reference (c). Delta Airplane Numbers 1 through 10 are affected by this change. Accordingly, all departments concerned are directed to proceed with the change outlined in Reference (b), revised as follows:

This change has no effect on specification language, and consists of painting all bare exterior surfaces, except where peculiar conditions require alternate treatment, and proposes the following paints:

- a. One coat "Epoxy" prime, Spec. 0-03021- Type I
- b. One coat white pigmented "Epoxy" top coat, Spec. 0.03021-Type II

This change results in a weight increase in guaranteed weight empty of 100 pounds.

ACTION: All concerned are authorized to proceed with the above. Specifications Group to forward revised specification pages to Contracts within four weeks of Sales Order date.

Change Order No. 14

pursuant to

Article 5 of Purchase Agreement dated 10 September 1956

by and between

Delta Air Lines, Inc. and General Dynamics Corporation (Convair Division)

- A. The Detail Specification is hereby amended to reflect certain changes all as more particularly set forth in Specification Change Nos. 130C, 159, 160, 167A, 169, 172, 173A, 174, 175, 176 and 177 and Commercial Change Proposal Summary No. 13 attached hereto and made a part hereof.

B. Airplanes Affected:

Undelivered - 10, except as follows:

Change No. 173A undelivered - 8; Delivery Nos. 3-10

C. Effect on weight and balance:

As reflected in the Specification Changes and Commercial Change Proposal Summary No. 13 attached.

D. Effect on performance:

As reflected in the Specification Changes and Commercial Change Proposal Summary No. 13 attached.

E. Effect on delivery:

None

F. This Change Order results in the following charges and/or credits:

1. Change No. 130C - Passenger Seat Fabric Weights, Revision to (No Pages Affected)	No Charges or Credits
2. Change No. 159 - Specification Administrative Change (Water Fire Extinguisher) (Page 112)	No Charges or Credits
3. Change No. 160 - Specification Administrative Change (Length of Canopy Assemblies) (Page 111)	No Charges or Credits
4. Change No. 167A - Transformer Rectifier for Buffets No. 2 and No. 3, Installation of (Page A-13)	No Charges or Credits
5. Change No. 169 - Specification Administrative Change (Buffet Equipment Changes) (Page 106)	No Charges or Credits
6. Change No. 172 - Specification Administrative Change (Waive Functional Check-out on Selcal and DMET Equipment) (Page 90)	No Charges or Credits

Change Order No. 14

pursuant to

Article 5 of Purchase Agreement dated 10 September 1956

by and between

Delta Air Lines, Inc. and General Dynamics Corporation (Convair Division)

7. Change No. 173A - Ramp Weight and Takeoff Weight, Increase of (Page 12a and 17)

	<u>Per Airplane</u>	<u>Total for 8 Airplanes</u>
Recurring Charge	\$ 839.00	\$ 6712.00
Non-recurring Charge	<u>408.00</u>	<u>3264.00</u>
Total Charges	\$1,247.00	\$9,976.00

8. Change No. 174 - Specification Administrative Change (L.G. Component Heat Treat) (Page 38)

No Charges or Credits

9. Change No. 175 - Specification Administrative Change (Delete L.G. Gear Control Throttle Switches) (Pages 33 and 80)

No Charges or Credits

10. Change No. 176 - Specification Administrative Change (Change "toggle-type" to "rotary-type" and "instruments" to "auxiliary") (Page 60)

No Charges or Credits

11. Change No. 177 - VG Recorder, Installation of Provisions for (Page 62 (Cont))

No Charges or Credits

12. Summary of the foregoing charges and/or credits:

	<u>Per Airplane</u>	<u>Total for Purchase Agreement</u>
Recurring Charge	\$ 839.00	\$ 6712.00
Non-recurring Charge	<u>408.00</u>	<u>3264.00</u>
Total Charges	\$1,247.00	\$9,976.00

- G. The attached Specification Change Nos. 130C, 159, 160, 167A, 169, 172, 173A, 174, 175, 176, 177 and Commercial Change Proposal Summary No. 13 are hereby incorporated into and become a part of Detail Specification Report No. ZD-22-003 dated 20 September 1956.

- H. Notwithstanding any other provisions of the Purchase Agreement and/or this Change Order No. 14 it is expressly understood and agreed that the execution hereof by General Dynamics Corporation is conditioned upon and expressly subject to the prior execution by Delta Air Lines, Inc. of Change Order Nos. 10, 11, 12 and 13 as said Change Orders were executed by General Dynamics Corporation. In the event said Change Order Nos. 10, 11, 12 and 13 are so executed by Delta Air Lines, Inc. this Change Order No. 14 shall be considered in full force and effect. In the event said Change Order Nos. 10, 11, 12 and 13 are not so executed by Delta Air Lines, Inc., this Change Order No. 14 shall be void and of no effect.

Change Order No. 14

pursuant to

Article 5 of Purchase Agreement dated 10 September 1956

by and between

Delta Air Lines, Inc., and General Dynamics Corporation (Convair Division)

X. Except as herein modified all provisions of the Detail Specification shall remain in effect.

Specification Administrative Change Additional Fuel Temperature Indication and Pitot Static Hose Size Change

Delta Air Lines has accepted as evidenced by Reference (a), our Proposal, Reference (b), prepared in accordance with MCL 10,451, Reference (c).

Description of Change:

Page 53, Paragraph 3.12.9.12 - FUEL TEMPERATURE INDICATION:

Revise the paragraph to read as follows:

"Five sensing elements shall be installed to transmit fuel temperatures. One shall be so located in the fuel tank that the temperature indicated shall be the most critical from a freezing standpoint. One indicator shall be used in connection with a selector switch to indicate fuel inlet temperature to each engine fuel filter and the fuel tank."

Page 62, Paragraph 3.14.3.6 - INSTRUMENT LINES AND CONNECTIONS:

Revise the first sentence as follows:

From: "Instrument lines shall be color coded in accordance with Design Drawing No. AMD10375."

To: "Instrument lines shall be color coded in accordance with Standard AMD10375."

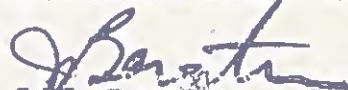

Revise the ninth sentence as follows:

From: "Flexible connections shall incorporate 1/4 inch hoses on the static side and 3/16 inch hose on the pitot side."

To: "Flexible connections shall incorporate 1/4-inch hoses, with different size fittings to prevent cross connection."

ACTION: All concerned are authorized to proceed with the above. Specifications RECEIVED Group to forward revised specification pages to Contracts within four weeks of Sales Order date.

(c) MIL No. 10,350

Specification Administrative Change Revision to Electronic and Electrical Component Cooling

Delta Air Lines has accepted as evidenced by Reference (a), our proposal, Reference (b), prepared in accordance with MIL 10,350, Reference (c).

Description of Change:

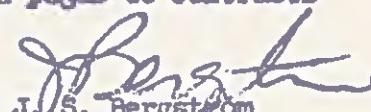

Page 122A, FIGURE 3.20-1 AIR CONDITIONING PRESSURIZATION SYSTEM:

Above illustration to be revised to show the effects of this proposal.

The following shall not appear in the Specification language:

The system is being redesigned to provide an overboard discharge duct, shut-off valve and Venturi from the electrical and electronic compartments. The overboard discharge duct will provide cooling during flight except at low altitudes when the cabin pressure differential is low. On the ground and during the low altitude conditions the present electronic cooling blower will be used. A shut-off valve will be provided in the discharge line which will be open at all times. This valve can be closed by a switch on the flight engineer's panel at the option of the crew when and if required in the event of loss of normal air flow to the cabin. The cabin pressure system will be revised to eliminate the differential bias. Its operation will be completely independent of the electronic cooling system.

ACTION: All concerned are authorized to proceed with the above. Specifications Group to forward revised specification pages to Contracts within four weeks of Sales Order date.

(c) MCL No. 10,336

Specification Administrative Change Passenger Compartment Light Dimming

Delta Air Lines has accepted as evidenced by Reference (a), our proposal, Reference (b), prepared in accordance with MCL 10,336.

Description of Change:

Page 76, Paragraph 3.16.8.3.3 - LIGHTING CONTROLS:

Revise the third and fourth sentences as follows:

From: "The general lighting throughout the passenger compartment shall be controlled from the cabin attendant's panel and shall have two degrees of light intensity; dim and full brilliance. The switches shall be down for the dim position, off in the center position and up for full brilliance."

To: "The general lighting throughout the passenger compartment shall be controlled from the cabin attendant panel and shall have light intensity controlled from dim to full brilliance. The switches shall be of the momentary type; and shall be down for the dim position, neutral in the center position and up for full brilliance. An on/off switch shall also be provided".

Page 78, Paragraph 3.16.8.7 - SIDE WINDOW LIGHTING:

Revise the last sentence to read as follows:

"A switch shall be installed on the aft stewardess panel to separate this lighting from the overhead cove lights."

ACTION: All concerned are authorized to proceed with the above. Specifications Group to forward revised specification pages to Contracts within four weeks of Sales Order date.

CHANGE ORDER NO. 12

pursuant to

Article 5 of Purchase Agreement dated 10 September 1956

by and between

Delta Air Lines, Inc., and General Dynamics Corporation (Convair Division)

A. The Detail Specification is hereby amended to reflect certain changes all as more particularly set forth in Specification Change No. 19E and Commercial Change Proposal Summary No. 11 attached hereto and made a part thereof.

B. Airplanes affected:

Undelivered - 10

C. Effect on weight and balance:

As reflected in the Specification Change and Commercial Change Proposal Summary No. 11 attached.

D. Effect on performance:

As reflected in the Specification Change and Commercial Change Proposal Summary No. 11 attached.

E. Effect on delivery:

None

F. This Change Order results in the following charges and/or credits:

1. Change No. 19E - Addition of Manufacturer Name and Part Number (Appendix I-C) (Pages A-1, A-2, A-3, A-4, A-5, A-6, A-7, A-7a, A-8, A-9, A-10, A-10a, A-12, A-13, A-15, A-17 and A-18)	No Charges or Credits
--	-----------------------

G. The attached Specification Change No. 19E and Commercial Change Proposal Summary No. 11 are hereby incorporated into and become a part of Detail Specification Report No. ZD-22-003 dated 20 September 1956.

H. Notwithstanding any other provisions of the Purchase Agreement and/or this Change Order No. 12 it is expressly understood and agreed that the execution hereof by General Dynamics Corporation is conditioned upon and expressly subject to the prior execution by Delta Air Lines, Inc. of Change Order Nos. 10 and 11 as said Change Orders were executed by General Dynamics Corporation. In the event said Change Order Nos. 10 and 11 are so executed by Delta Air Lines, Inc. this Change Order No. 12 shall be considered in full force and effect. In the event said Change Order Nos. 10 and 11 are not so executed by Delta Air Lines, Inc., this Change Order No. 12 shall be void and of no effect.

CHANGE ORDER NO. 12

pursuant to

Article 5 of Purchase Agreement dated 10 September 1956

by and between

Delta Air Lines, Inc., and General Dynamics Corporation (Convair Division)

- I. Except as herein modified all provisions of the Detail Specification shall remain in effect.

Accepted and Agreed to

STABILIZER TRIM CONTROL
ELECTRIC DRIVE CAPABILITY INCORPORATION OF

Delta Air Lines has accepted, as evidenced by Reference (a), our Proposal, Reference (b), prepared in accordance with MEL 10,207, Reference (c).

Description of Change:

Page 40 Add the following new paragraph, after paragraph 3.10.1.5:

"3.10.1.5.1 STABILIZER TRIM CONTROL: An electrically operated motor and clutch assembly shall be incorporated in the stabilizer trim system to provide control of stabilizer trim by means of switches installed on a knob on the upper part of the outboard horn of the pilot's and co-pilot's control wheels. Switches shall be installed at an angle inclined forward of the vertical. The switches shall be of the slide-contact-type and shall operate up and forward for nose down trim and down and aft for nose up trim. An override switch shall be provided on the pedestal, adjacent to the stabilizer hydraulic cutoff, capable of disconnecting all power to the electric stabilizer trim system. This switch shall be guarded in the "on position".

DELT A OWNED MATERIAL

Delta Air Lines has loaned to Convair one (1) Mapco Warming Oven, Part No. 206-117, Serial No. 12057 and one (1) Mapco Two-Gallon Liquid Container, Part No. 180-117, Serial No. 4848 for use in the development and manufacture of Delta buffets. The customer delivered these items direct to the Furnishings Group in the Engineering Department for further transmittal to Weber Manufacturing Company. The loan of this equipment is being made for a period of thirty (30) days. Therefore, unless further advised both items should be returned to Delta Air Lines, Attention: C. J. May, Building 19, Room 129 on June 1, 1959.

REDESIGN OF EXTERIOR MARKINGS AND COLOR SCHEMES

1. These Minutes cancel and supersede previous Minutes #115.
2. Delta Airlines has accepted by Reference (a) our Proposal, Reference (d), prepared in accordance with Reference (c). Effective on all 22-2 aircraft.
3. This change results in an increase of guaranteed weight empty of sixty-one (61) pounds per aircraft but does not affect performance or delivery schedule for Ship Nos. 2 & 3 and an increase of 22 lbs. for Ship #1 and 4 through 10.
4. Engineering will forward two (2) sets of the revised exterior markings drawings to Contracts for transmittal to Delta for review and recheck.
5. Delta advises that use of Scotch Cal markings for the Convair emblem, the American Flag and the Delta Crown will be acceptable. All other markings must be painted.

ACTION: All concerned are authorized to proceed with the above. Specifications Group to forward revised specification pages to Contracts within four weeks of Sales Order date.

CONVAIR 880 - DELTA

USE OF TURBINE ENGINE OIL

1. Under references (a) and (c) Delta Air Lines has advised that Texaco No. 15 synthetic aircraft turbine engine oil has been selected for use in the General Electric engines to be installed in the Delta version of the Convair 880 aircraft. Accordingly, departments concerned are directed to procure and use Texaco No. 15 turbine engine oil in Delta Air Lines Convair 880 Aircraft including Delta's Ship No. 1 (Manufacturing No. 4) which is presently scheduled for the flight test program.
2. Because of the small amount of oil involved, it is recommended that it be purchased in cans in lieu of bulk which will eliminate the need for additional handling equipment required for storage of bulk oil.

EXTERIOR MARKINGS AND COLOR SCHEMES. DELTA SELECTED

- (1) Sales Order No. 880-2-129 authorized all departments to proceed with the Delta Air Lines selected exterior markings and color schemes as outlined in Commercial Change Proposal No. 171 (MCL 10,282). Reference (b), Delta wires authorize Convair to stop work immediately on DAL's previously selected exterior markings and color schemes and to proceed with the preparation of drawings for new exterior markings and color schemes as outlined at reference (a) meeting. This Sales Order, therefore, cancels and supersedes Sales Order No. 880-2-129.
- (2) Engineering is authorized to proceed immediately with the preparation of new drawings in accordance with changes outlined by Delta Representatives at Reference (a) meeting. Drawings will be completed and submitted to Delta within four weeks (23 March 1959). Delta will be given two weeks to review and approve the drawings.
- (3) A formal Commercial Change Proposal will be prepared in accordance with reference (c) MCL to reflect the effect on weight, aircraft performance, delivery schedule and contract price. After execution of the formal Commercial Change Proposal this Sales Order will be revised accordingly.

Revised to cancel - superseded by S.O. 880-2-172.

Delta Air Lines has accepted, as evidenced by Reference (a), our Proposal, Reference (b), prepared in accordance with MCL 10,314, Reference (c).

The task is as follows:

- I. Replace escutcheons and lettered plastic panels as follows with bilingual wording (Spanish & English).
 - A. "No Smoking" - "Fasten Seat Belts" (4) (One (1) in the lounge and three(3) in the cabin area)
 - B. "Occupied - Vacant" (3) (One (1) for each lavatory)
 - C. "Exit" (4) required - "Emergency Exit" (2) required
 - D. Instructions for operating emergency exit hatches to be in Spanish and English.
 - E. "Lavatory" signs (3) required (non edge lighted placard)
 - F. Installation for unilingual and bilingual signs will be interchangeable.

This change results in an increase in the guaranteed weight empty of nine (9) pounds per airplane.

ACTION: All concerned are authorized to proceed with the above. Specifications Group to forward revised specification pages to Contracts within four weeks of Sales Order date.

Specification administrative change
Landing gear warning horn and deletion of landing control throttle switches.

Delta Air Lines has accepted, as evidenced by Reference (a), our proposal, Reference (b), prepared in accordance with MCL No. 289, Reference (c).

Description of Change:

Page 32, Paragraph 3.8.1.2 CONTROLS:

Revise the fifth sentence, starting in the 12th line to read as follows:

"The control lever shall remain locked until the left hand shock strut is extended and both main landing gear trucks are in the level zone."

Page 80, Paragraph 3.16.11.1 LANDING GEAR WARNING HORN:

Revise the paragraph title and paragraph to read as follows:

"**LANDING GEAR AND STABILIZER WARNING HORN:** A horn shall be provided to operate under the following conditions:

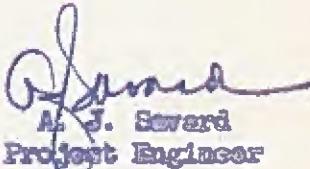

When any landing gear is not fully extended and locked with the aircraft airborn, the horn will operate if any power lever is retarded or if the flaps are immediately beyond the approach position. The power lever retard function will have a horn interrupter switch.

When the aircraft is ground borne, the horn will operate if the landing gear override lever is moved.

When the airplane is on the ground and any two or more of the power levers are advanced to take-off position, the horn will operate if the stabilizer and/or the flaps are not in the correct take-off position."

MODEL 880 - DELTA

CABIN MODIFICATION AND INSTALLATION OF TWELVE (12) PLACE CLUB AREA

1. Delta Airlines has accepted by reference (a) our proposal, reference (b), prepared in accordance with MCL No. 206, reference (c). Delta airplane numbers 1 through 10 are affected by this change. Accordingly, all departments concerned are directed to proceed with the change outlined in reference (b).

2. Delta Airlines' acceptance of reference (b) Commercial Change Proposal is based on the condition that this proposal will be revised to include the following:

(a) Add a statement at the bottom of page 5 which will not be included in specification language but is provided for information only as follows:

"The weights reflected in this CCP do not duplicate any weight items included in CCP 130A (interior fabric weights) previously approved by Delta Airlines on 27 August 1958".

(b) On Page 4 under the reference to page A-2, Appendix I-C Electrical System add "forty-four (44) Valance type fluorescent lights".

3. Engineering Specification Section will revise Commercial Change Proposal No. 138 as indicated above and forward necessary revised specification pages to the Contracts Department within four (4) weeks (11/28/58) per reference (d). A separate change order summary will be prepared for this proposal.

4. This change results in an increase of guaranteed weight empty of 351.8 pounds but does not affect performance or delivery schedule.

FOR ACCOUNTING DEPARTMENT ONLY

5. This change results in an increase in price per aircraft of \$4,000 as follows:

Recurring	\$4,000 per aircraft
Non-recurring	None

RECEIVED

NOV 5 '58

PROJECT
SPEC.
GROUP

for a total contract increase of \$40,000. All non-recurring costs in connection with this change have been absorbed by Convair.

5 December 1958

ATTACHMENT TO DELTA MINUTES #134
Model 22-1
(Cabin Passenger Seats and Related CCP's)

The design must incorporate all items contained in the memo, Project Office to Furnishings Group, (Mallinger/Beckett) dated 28 November 1958, "Design Revisions to Cabin Passenger Seats Prior to Production Engineering Model 22." Customer comments in accordance with those items outlined below shall be incorporated. Where there may be a conflict between the Delta memo and the Project Office memo, the Delta memo shall have priority. Project Office comments are contained in parenthesis beside the conjectural items noted below:

Under NCL 10,310 the Furnishings Group has 300 hours which shall be used to lay out the revision to the adjustable head rest in order to meet CAA delethalization requirements in addition to providing full time coordination during the seating vendor's production engineering program. It is absolutely mandatory that no delays to production engineering be incurred which could be chargeable to Convair's Engineering Department. The production engineering phase is scheduled for completion 60 calendar days subsequent to 8 December 1958.

The Delta comments follow:

UPHOLSTERY

1. The upholstery application in general is not satisfactory. More "snap" is needed to attain a professional appearance.
2. Foam or a similar material is needed on the inboard end of the bottom structure under the fabric cover. (Allowance shall be made for access to recline lock support rivets)
3. A means should be provided for retaining the fabric on the seat back under the tray table. A trim strip at the color break line could be used to accomplish this objective.
4. Seat back covers should be interchangeable.
5. Three snaps are required for attaching the head rest cover. (Location, dimension, etc. are to be furnished to Convair).

SEAT BACK

1. Additional support in the kidney region is required in the back cushion. The comfort in this area obtained in the "iron horse" should be regained.
2. The metal fairing on the lower inboard side of the back should have rounded edges to prevent shoe scuffing. (Weight shall be reduced on these metal panels. The installation bolts shall not interfere with the structural attachment of the seat back. The cutboard fairing shall be redesigned for greater rigidity).

SEAT BOTTOM

1. The bottom pan should be notched to permit the back to fold forward after removal of the bottom cushion.
2. The angle of the bottom needs to be increased to prevent sliding forward.

SEAT BOTTOM - (cont)

2. A suitable solution was demonstrated by placing a strip of foam under the forward edge of the softer molded cushion. The maximum height from the floor to the top of the cushion leading edge should be 18 inches

ASH TRAY

1. The aft stop on the ash tray cover should be moved forward.
2. The forward land in the ash tray should be deleted.
3. There would be no objection to raising the ash tray cover slightly (This shall be accomplished).

FLOOR ATTACHMENTS

1. The pip pin retainers should be deleted. (Rubber Straps)
2. The pip pins should be hidden (Maximum of 1/8 inches visible)

TRAY TABLE

1. The glass recess in the tray table should be moved forward one inch

LIFE VEST STOWAGE

1. The center upholstery Bungee should be used to retain the life vest. A tab (and snap or lift-the-dot) should be provided for ease of vest removal.

SEAT BELT

1. Delta seat belt has a fabric loop at each end. The length of one side from the loop to the end of the buckle is 18 1/2". The length of the other side from the loop to the end of the tab is 28". Vendor and color to be supplied by Delta.

DETAILED MATERIALS TO TRANSMITTER

Delta has loaned to Convair two (2) each ATC transponders-type
Collins Type 621A-1 Serial Nos. 22 and 23 for the purpose of functional check-out
prior to installation in Delta's new Model 880 airplanes as required by R. Harris
of Delta Air Lines. He transmitted these to Contract Contracts Department, Room 129,
in accordance with reference (b).

Contract Contracts Department is requested to originate a dummy receiving report
to record receipt of the transponders in accordance with the above. This
dummy receiving report should be forwarded to Contract Contracts Department
attention of C. J. Harris, Building 19, room 129 (Mail Room 129).
These transponders will be forwarded to Material Stores, Building 4,
Room 129, Attention G. McCullough. These units will be used by Field Contracts
Department until such time as the previous being installed in Delta's Convair
aircraft. In order that a record may be maintained of this transaction,
the serial number required, will be requisitioned from Material Stores on the
same date.

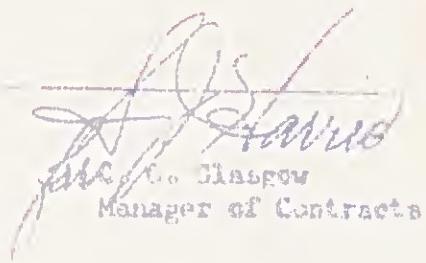

In the interest of maintaining accountability and insurance on these
transponders, Contract Contracts Department is hereby advised that the article
has an approximate value of \$3,000 each.

Contract Contracts will effect final disposition for return of the
two to Delta by issuing a revision to this Sales Order.

- (5) Under reference (c) Delta has advised that they have elected to install
Wilcox transponders after delivery of their Convair 880 aircraft instead
of the Collins units provided as outlined above. The two (2) each ATC
transponders, Collins Type 621A-1, Serial Nos. 22 and 23, are to be
shipped immediately to Delta Air Lines, Attention: C. J. May, Building 19,
Room 129.

NO. 10,000

MODEL 880 - DELTA

EXTERIOR MARKINGS AND COLOR SCHEMES. DELTA SELECTED

- (1) Delta Air Lines has accepted, as evidenced by Reference (a), our proposal Reference (b), prepared in accordance with MCL No. 10,282, Reference (c). Accordingly, all departments concerned are directed to proceed with the change outlined in Reference (b).
- (2) Engineering Specification Section will forward necessary revised specification pages to the Contracts Department within four weeks (10/10/58) per Reference (d).
- (3) This change results in a weight increase of sixty one (61) pounds with no effect on aircraft performance, delivery schedule, or contract price.
- (4) In accordance with reference (c) wire, all departments concerned will immediately stop work on the DAL Selected Exterior Markings and Color Schemes outlined by reference (b) Commercial Change Proposal. This Sales Order is cancelled and superseded by Sales Order No. 880-2-166 which authorizes Engineering to proceed immediately with preparation of new Delta desired exterior markings and color scheme.

1. EXTERIOR MARKINGS AND COLOR SCHEMES, DELTA SELECTED

As evidenced by reference (a), Delta Air Lines has accepted our proposal, reference (b), prepared in accordance with MCL No. 10,282, reference (c). Accordingly, all departments concerned are directed to proceed with the change outlined below:

Description of Change:

This change is only for weight accountability, and has no effect on Specification language. The exterior markings will be in accordance with Delta Air Lines Drawing "Markings Installation - CV 880" Number 110-190R, Revision 'A' dated 18 August 1958.

This change results in a weight increase of sixty one (61) pounds with no effect on aircraft performance, delivery schedule or contract price.

ACTION: All concerned are authorized to proceed with the above. Engineering Specification Group will forward necessary revised specification pages to Contracts within four weeks of Sales Order date.

Cancelled and superseded by Minutes #145
dated 17 March 1959

1. INTERIOR FABRIC WEIGHTS, REVISION TO:

Delta Air Lines has accepted, as evidenced by reference (a), our proposal, reference (b), prepared in accordance with MCL 194, reference (c), with the exception that the fabric for the seats in the club area will not be procured pending final resolution of the passenger seat design.

The following is not to appear in the Specification language:

The below listed items show revised weights for fabrics selected by Customer for interior trim. The following information predicated upon installation of a 12-place club area.

Cabin and Club Area Floor Covering (including 9" up sidewall)	47.0 oz
Seat Upholstering (6 doubles) (Club area)	14.0 oz
Partition Covering	18.0 oz
Partition (Polyplastex)	21.0 oz

Seat fabric weights not included in this proposal.

This change results in a weight increase of 92 pounds per airplane.

ACTION: All concerned are authorized to proceed with the above.

CHANGE ORDER NO. 6
to
DELTA AIR LINES, INC.
Detail Specification Report No. ZD-22-003
Dated 20 September 1956

A. The Detail Specification is hereby amended to reflect certain changes all as more particularly set forth in Specification Change Nos. 1, 25, 61A, 74 and 77 and Commercial Change Proposal Summary No. 5 attached hereto and made a part hereof.

B. Airplanes Affected:

Undelivered - 10

C. Effect on weight and balance:

As reflected in the Specification Changes and Commercial Change Proposal Summary No. 5 attached.

D. Effect on performance:

As reflected in the Specification Changes and Commercial Change Proposal Summary No. 5 attached.

E. Effect on delivery:

None

F. This Change Order results in the following charges and/or credits:

1. Change No. 1 - Airplane Configuration, Detailed Revision to (Pages 6A, 12A, 13, 37, 39, 40, 41 and 42)

No Charges or Credits

2. Change No. 25 - A-C Generators, Clarification of (Page A3)

No Charges or Credits

3. Change No. 61A - Door Open Warning Indicator, Installation of (Pages 80, 81 (runover) and 89)

No Charges or Credits

	<u>Per Airplane</u>	<u>Total for 10 Airplanes</u>
Recurring Charge	\$ 476.00	\$ 4,760.00
Non-Recurring Charge	<u>\$ 966.00</u>	<u>\$ 9,660.00</u>
Total Charges	<u>\$ 1,442.00</u>	<u>\$ 14,420.00</u>

1. SUPPLEMENTARY FLUORESCENT LIGHTING ON PILOTS' PANELS

Delta Air Lines has accepted, as evidenced by reference (a), our proposal, reference (b), based on reference (c), MEL 227. The task is as follows:

- A. Add one circuit breaker and nameplate to circuit breaker panel.
- B. Fabricate and install three fluorescent fixtures under glare shield - mounting provisions already installed. Fixtures consist of sheet metal reflectors similar to those used in cockpit lighting mock-up.
- C. Purchase and install three 8 watt instant start ballasts.
- D. Replace pilot's white light rheostat with one containing a switch at the maximum incandescent brightness level such that when rheostat is turned to maximum level, the fluorescent fixtures will light in addition to the incandescent lights.
- E. Purchase and install three 8 watt T-5 lamps per airplane.

This change results in a weight increase of 4 pounds per airplane.

ACTION: All concerned are authorized to proceed with the above. Specifications Group to forward revised specification pages to Contracts within three weeks of Sales Order date.

1. TURN AND BANK INDICATOR, REVISION TO

Delta Air Lines has accepted, as evidenced by reference (a), our proposal, reference (b), prepared in accordance with reference (c). The task is as follows:

A. Revise six (6) harnesses as follows:

- (1) Delete six (6) wires from the electrical rack to the pilot's instrument panel.
- (2) Add two (2) wires from the circuit breaker panel to the pilot's instrument panel.

B. Delete two (2) three (3) phase transformers and two (2) triple fuse blocks from the R.H. electrical rack.

C. Revise nameplate on AC power distribution box.

D. Revise nameplate on pilot's essential bus.

E. Revise circuit breaker panel to add two (2) 5 amp circuit breakers.

F. Fabricate new nameplate for circuit breaker panels.

G. For DAL replace Pioneer Central turn and bank indicator #3920-1AD-A1-1 with Pioneer Central turn and bank indicator #3924-1AG-B-1.

NOTE: Panels in "G" above are physically interchangeable in their respective panels.

Wiring portion of this change will be available to metal mock-up 5 weeks after go-ahead. Mechanical portion of this change will be available to Shop by means of sketches and marked-up prints 4 weeks after go-ahead. Engineering paper will follow. ARM's for new indicators will be issued 4 weeks after go-ahead.

This change results in a weight decrease of 1.0 pound per airplane.

ACTION: All concerned are authorized to proceed with the above. Specifications Group to forward revised specification pages to Contracts within three weeks of Sales Order date.

APPLICABLE FEDERAL REGULATIONS

- (1) Delta Air Lines has accepted, as evidenced by Reference (a), our proposal, Reference (b), based upon MCL No. 167, Reference (c). This acceptance is contingent upon the deletion of "land type" in the specification language. Per Reference (d), Engineering is agreeable to the deletion of "land type" inasmuch as this is defined in Paragraph 1.1 of the Detail Specification No. ZD-22-003.
- (2) In accordance with Paragraph (1), Engineering Specification Section will forward necessary revised specification pages to the Contracts Department within three weeks (5/8 /58) per Reference (c).
- (3) This change results in an increased weight per airplane of 2.5 lbs, with no effect on delivery schedule, aircraft performance, nor contract price.

22-2

Reference: (a) S.O. 880-2-103 dated 9 April 1958
(b) Commercial Change Proposal No. 136
(c) MCL 198

1. Walter Kidde Nacelle Fire Extinguisher Equipment.

Delta Air Lines has accepted, as evidence by reference (a), our proposal reference (b), for installation of the Walter Kidde fire extinguishing equipment.

The task is as follows:

A. Rohr Task:

- 1) Delete Accessory Products Company fire extinguishing system (Solenoid actuated valve).
- 2) Install Walter Kidde fire extinguishing system utilizing a cartridge-type method of puncturing a frangible disc. (Single squib).

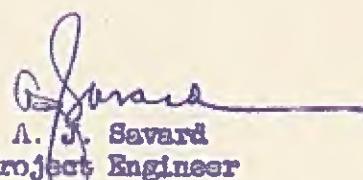

B. Convair Task:

- 1) Revise 9 harnesses by changing wire gauge (7 harnesses change from 14 gauge to 12 gauge - total approx. 800'. 2 harnesses change from 12 gauge to 10 gauge - total approx. 200').

This change results in a weight increase of 7 lbs. per airplane.

ATTN: All concerned are authorized to proceed with the above task. This change has no effect on specification language.

(b) Commercial Change Proposal No. 110

1. Fire Warning Bell

As evidenced by reference (a), Delta Air Lines has accepted our proposal, reference (b), a Specification Administration Change.

Description of Change:

Page 80, Paragraph 3.16.11.2 FIRE WARNING BELL:

In the second line, place a comma after "engines" and delete the last three words in the line "(or wheel wells,)"

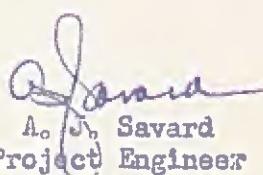

Figure 3.19-9 SCHEMATIC - WHEEL WELL FIRE DETECTION:

Delete the above figure from the Specification.

Figure 3.19-10 MOD 22 FIRE EXTINGUISHING SYSTEM SCHEMATIC

Revise the above figure to delete pylon fire extinguishing from the diagram.

ACTION: All concerned are authorized to proceed with the above change. Specifications Group to forward revised specification pages to Contracts within three weeks of Sales Order date,

A. J. Savard
